

Garrett Stack

Cybersecurity Training & Enablement | Technical Training | Security Automation

Ireland · garstack@gmail.com · linkedin.com/in/garrett-stack · garstack.com

PROFESSIONAL SUMMARY

Technical trainer with 10+ years designing and delivering training for enterprise software customers and global workforces at DocuSign and Amdocs, now focused on cybersecurity training and enablement. Supported 200+ enterprise SaaS implementations, turning complex technical products into clear, practical training for technical and non-technical audiences. Brings hands-on security automation experience (Tines, n8n, Make), a Higher Diploma in Cloud Computing, and current work with Docker, Kubernetes and API integrations. Combines QQI Train the Trainer certification with a computer science background (MSc, Oracle Java certified).

SELECTED ACHIEVEMENTS

- Supported **200+ enterprise SaaS implementations** through onboarding, training and customer documentation.
- Designed and scaled onboarding frameworks and reusable learning models adopted across multiple client engagements.
- Completed Tines training exercises covering workflow design, API pagination, troubleshooting and refactoring, alongside n8n and Make automation courses.
- Since 2024, built and deployed web and learning platforms with third-party API integrations and continuous deployment pipelines.

SKILLS

Training & Enablement: Technical training delivery (virtual, classroom, self-paced), training needs analysis, curriculum design, awareness and adoption programmes, QQI Train the Trainer

Security Automation: Tines, n8n, Make, workflow design, API integrations, error monitoring and troubleshooting, credential and header authentication configuration

Cloud & Infrastructure: Cloud computing (Higher Diploma), Docker, Kubernetes, CI/CD (GitHub Actions, Vercel)

Data Protection: GDPR awareness, privacy policy review

Content & Tools: Articulate, video training, software simulations, technical documentation (Diataxis, MkDocs), TalentLMS administration

Technical: Python, Java (Oracle certified), Next.js, Supabase, REST APIs, AI-assisted development (Claude Code)

PROFESSIONAL EXPERIENCE

Career Break & Independent Projects | Developer, Course Designer & Technical Writer

2024 - Present

- **Security automation:** Completed Tines training exercises (event timers, API pagination, troubleshooting, refactoring, input/output workflows) and n8n courses building API-driven workflows with error monitoring.
- **Technical documentation:** Writing a docs-as-code site on Kubernetes, Docker and automation tooling, structured with the Diataxis framework.
- **Learning platform:** Designing and building a learning platform and its courses, with Google and LinkedIn integrations and course reports generated through an LMS API.
- **Entertainment website:** Built and deployed nighthawks.live, integrating the Ticketmaster API (Next.js, GitHub, Vercel).
- **Upskilling:** Studying AI, digital technologies (Digital4Business Postgraduate Certificate) and the pharmaceutical industry (part-time BA in Pharmaceutical Operations, Innopharma Education).
- **House renovation:** Project-managed the renovation of an older house, (managing budget, trades and scheduling); now nearing completion and available for a full-time role.

DocuSign | Professional Services Training Specialist

Jan 2020 - Apr 2024

- Delivered enterprise onboarding and training programmes for global SaaS customers across **200+ implementations**, closing capability gaps and increasing product adoption.
- Translated complex technical product details, verified with Product and Engineering SMEs, into clear training for technical and non-technical users.
- Tailored training and documentation to each implementation's configuration, workflows and user roles.
- Produced video training and learning aids that supported adoption and customer self-service.
- Designed and scaled onboarding frameworks used across multiple client engagements.

Amdocs | Product Learning Specialist

Jun 2017 - Jan 2020

- Managed learning delivery for large-scale telecommunications deployments across a globally dispersed workforce.
- Conducted learning-needs assessments and capability gap analyses to ensure operational readiness before go-live.
- Developed blended learning programmes (classroom, virtual and self-paced) and standardised delivery processes and materials.
- Adapted technical content to different customer environments, workflows and operational requirements.

Self-Employed | Java Trainer / Course Designer (Contract)

Sep 2016 - Mar 2017

- Delivered structured Java training that prepared students for Oracle Java certification.
- Created hands-on programming exercises and course materials focused on practical, job-ready skills.

EDUCATION

- **BA in Pharmaceutical Operations** (part-time, in progress), Innopharma Education, expected 2027
- **Higher Diploma in Cloud Computing**, Munster Technological University (1st Class Honours)
- **MSc in Computer Science (Interactive Media)**, University College Cork. Project: interactive 3D training simulation for dental students (Unity, C#)
- **Higher Diploma in Computer Science**, University College Cork (1st Class Honours)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Train the Trainer**, Quality and Qualifications Ireland (QQI)
- **Oracle Certified Professional**, Java
- **Certified ScrumMaster**, Scrum Alliance
- **Postgraduate Certificate in Digital Technologies**, Digital4Business (in progress)
- **Generative AI for Educators & Teachers Specialisation**, Vanderbilt University
