

Garrett Stack

Instructional Designer | Learning Experience Design | eLearning Development

Ireland · garstack@gmail.com · linkedin.com/in/garrett-stack · garstack.com

PROFESSIONAL SUMMARY

Instructional designer with 10+ years designing, developing and evaluating learning for enterprise software customers and global workforces at DocuSign and Amdocs. Covers the full learning lifecycle, from needs analysis and curriculum design to Articulate and video content, LMS administration and evaluation. Designed and scaled onboarding frameworks and reusable learning models used across multiple client engagements. Currently designing courses and building a learning platform with Google, LinkedIn and LMS API integrations. Brings a computer science background (MSc in Interactive Media) and QQI Train the Trainer certification to building engaging, technically accurate learning.

SELECTED ACHIEVEMENTS

- Built reusable learning models adopted across multiple client engagements, driving consistency at scale.
- Supported **200+ enterprise SaaS implementations** through scalable onboarding and learning solutions.
- Improved learner adoption through targeted onboarding and workflow enablement.
- Since 2024, designing courses and building a learning platform with course reporting through an LMS API.

SKILLS

Instructional Design: Full learning lifecycle (analysis, design, development, delivery, evaluation), training needs analysis, curriculum and course design, adult-learning principles, blended learning

eLearning Development: Articulate, video training, software simulations, screen recording, interactive media, content localisation and adaptation

Learning Technologies: TalentLMS administration, LMS API reporting, learning platform development (Google and LinkedIn integrations), content management systems

Evaluation & Analytics: Learner engagement tracking, training KPIs, feedback analysis, Power BI, continuous improvement

AI & Technical: Generative AI learning workflows (Vanderbilt specialisation), AI-assisted content creation, Next.js, Python, Java, Unity (C#)

Collaboration: SME partnership, stakeholder needs analysis, cross-functional work with Product, Engineering and Customer Success

PROFESSIONAL EXPERIENCE

Career Break & Independent Projects | Course Designer, Developer & Technical Writer 2024 - Present

- **Learning platform:** Designing courses and building the learning platform that hosts them, with Google and LinkedIn integrations and course reports generated through an LMS API.
- **Technical documentation:** Writing structured learning content on Kubernetes, Docker and automation tooling using the Diataxis framework (tutorials, how-to guides, reference, explanation).
- **Entertainment website:** Built and deployed nighthawks.live, integrating the Ticketmaster API (Next.js, GitHub, Vercel).
- **garstack.com:** Built a headless-CMS platform (Next.js, Sanity, Supabase) with automated email workflows and analytics tracking.
- **Upskilling:** Studying AI, digital technologies (Digital4Business Postgraduate Certificate) and the pharmaceutical industry (part-time BA in Pharmaceutical Operations, Innopharma Education).
- **House renovation:** Project-managed the renovation of an older house, (managing budget, trades and scheduling); now nearing completion and available for a full-time role.

DocuSign | Professional Services Training Specialist Jan 2020 - Apr 2024

- Designed and scaled onboarding frameworks and reusable learning models used across multiple client engagements.
- Delivered enterprise onboarding and learning programmes for global SaaS customers across **200+ implementations**.
- Produced video training and learning aids that supported product adoption and customer self-service.
- Tailored learning content to each implementation's configuration, workflows and user roles.
- Collected and verified technical details with SMEs to keep learning content accurate.

Amdocs | Product Learning Specialist Jun 2017 - Jan 2020

- Conducted learning-needs assessments and capability gap analyses to ensure operational readiness.

- Developed blended learning programmes (classroom, virtual and self-paced) and standardised delivery processes and materials.
- Adapted learning content to different customer environments, workflows and operational requirements.
- Managed learning delivery for large-scale telecommunications deployments across a globally dispersed workforce.

Self-Employed | Java Trainer / Course Designer (Contract)

Sep 2016 - Mar 2017

- Delivered structured Java training that prepared students for Oracle Java certification.
- Created hands-on programming exercises and course materials focused on practical, job-ready skills.

EDUCATION

- **BA in Pharmaceutical Operations** (part-time, in progress), Innopharma Education, expected 2027
- **Higher Diploma in Cloud Computing**, Munster Technological University (1st Class Honours)
- **MSc in Computer Science (Interactive Media)**, University College Cork. Project: interactive 3D training simulation for dental students (Unity, C#)
- **Higher Diploma in Computer Science**, University College Cork (1st Class Honours)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Train the Trainer**, Quality and Qualifications Ireland (QQI)
- **Oracle Certified Professional**, Java
- **Certified ScrumMaster**, Scrum Alliance
- **Postgraduate Certificate in Digital Technologies**, Digital4Business (in progress)
- **Generative AI for Educators & Teachers Specialisation**, Vanderbilt University
