

Garrett Stack

Senior Technical Trainer | Customer Enablement | Enterprise Software

Ireland · garstack@gmail.com · linkedin.com/in/garrett-stack · garstack.com

PROFESSIONAL SUMMARY

Technical trainer with 10+ years designing, delivering and evaluating training for enterprise software customers and global workforces at DocuSign and Amdocs. Supported 200+ enterprise SaaS implementations through onboarding and training, designed and scaled onboarding frameworks used across multiple client engagements, and standardised delivery processes and materials for large-scale deployments. Confident delivering to multicultural audiences through virtual, classroom and self-paced formats. Combines QQI Train the Trainer certification with a computer science background (MSc, Oracle Java certified) and current hands-on work building a learning platform and technical courses.

SELECTED ACHIEVEMENTS

- Supported **200+ enterprise SaaS implementations** through onboarding and training, preparing customers for go-live.
- Designed and scaled onboarding frameworks and reusable learning models adopted across multiple client engagements.
- Standardised training delivery processes and materials across large-scale, globally dispersed deployments.
- Improved customer adoption through targeted onboarding and workflow enablement.

SKILLS

Training Delivery: Virtual classrooms, webinars, in-person classroom, self-paced and on-demand learning, global multicultural audiences, technical and non-technical audiences, QQI Train the Trainer

Training Design: Full training lifecycle, training needs analysis, capability gap analysis, curriculum and course design, blended learning, adult-learning principles

Content & Tools: Articulate, video training, software simulations, screen recording, TalentLMS administration, LMS API reporting

Evaluation & Analytics: Training KPIs, learner engagement tracking, feedback analysis, Power BI, continuous improvement

Stakeholder Management: Partnership with Customer Success, Product, Engineering and Professional Services, SME collaboration, multi-project coordination, global multi-time-zone delivery

Technical & AI: Java (Oracle certified), Python, Next.js, Docker, Kubernetes, cloud computing, API integrations, AI-assisted content creation

PROFESSIONAL EXPERIENCE

Career Break & Independent Projects | Course Designer, Developer & Technical Writer

2024 - Present

- **Learning platform:** Designing and building a learning platform and its courses, with Google and LinkedIn integrations and course reports generated through an LMS API.
- **Technical documentation:** Writing a docs-as-code site on Kubernetes, Docker and automation tooling, structured with the Diataxis framework.
- **Entertainment website:** Built and deployed nighthawks.live, integrating the Ticketmaster API for live event data (Next.js, GitHub, Vercel).
- **garstack.com:** Built a headless-CMS platform (Next.js, Sanity, Supabase) with automated email workflows and continuous deployment.
- **Upskilling:** Studying AI, digital technologies (Digital4Business Postgraduate Certificate) and the pharmaceutical industry (part-time BA in Pharmaceutical Operations, Innopharma Education).
- **House renovation:** Project-managed the renovation of an older house, (managing budget, trades and scheduling); now nearing completion and available for a full-time role.

DocuSign | Professional Services Training Specialist

Jan 2020 - Apr 2024

- Delivered enterprise onboarding and training programmes for global SaaS customers across **200+ implementations**, closing capability gaps and increasing product adoption.
- Designed and scaled onboarding frameworks and reusable learning models used across multiple client engagements.
- Produced video training and learning aids that supported product adoption and customer self-service.
- Tailored training to each implementation's configuration, workflows and user roles.
- Partnered with Customer Success, Product, Engineering and Professional Services SMEs to keep training accurate and up to date.

Amdocs | Product Learning Specialist

Jun 2017 - Jan 2020

- Managed learning delivery for large-scale telecommunications deployments across a globally dispersed workforce.
- Developed blended learning programmes (classroom, virtual and self-paced) and standardised delivery processes and materials.
- Conducted learning-needs assessments and capability gap analyses to ensure operational readiness before go-live.
- Adapted learning content to different customer environments, workflows and operational requirements.

Self-Employed | Java Trainer / Course Designer (Contract)

Sep 2016 - Mar 2017

- Delivered structured Java training that prepared students for Oracle Java certification.
- Created hands-on programming exercises and course materials focused on practical, job-ready skills.

EDUCATION

- **BA in Pharmaceutical Operations** (part-time, in progress), Innopharma Education, expected 2027
- **Higher Diploma in Cloud Computing**, Munster Technological University (1st Class Honours)
- **MSc in Computer Science (Interactive Media)**, University College Cork. Project: interactive 3D training simulation for dental students (Unity, C#)
- **Higher Diploma in Computer Science**, University College Cork (1st Class Honours)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Train the Trainer**, Quality and Qualifications Ireland (QQI)
- **Oracle Certified Professional**, Java
- **Certified ScrumMaster**, Scrum Alliance
- **Postgraduate Certificate in Digital Technologies**, Digital4Business (in progress)
- **Generative AI for Educators & Teachers Specialisation**, Vanderbilt University
